

HISTORY OF THE VIRGINIA SECTION

The first compilation of the history of the Virginia Section covered the period 1907- 1937. Subsequent additions were made for the periods 1938-1948 and 1948- 1959. In 1988, Dr. W. Allan Powell began to compile the history of the Section from 1960 through 1990. Dr. Powell edited the previous historical accounts and combined them with his summary of the 1960-1990 period. In 1993, he completed The Virginia

of the American Chemical Society: The First Seventy-Five Years. This was published in book form in 1996 under the leadership of the 1995 Section Chair, Mr. Larry H. White. A series of photographs were added to Dr. Powell's text. Copies of the completed history were made available to ACS members, schools, libraries, and organizations. Larry White and Jim Beck are now working on an update to cover the period 1991 through 2015.

THE VIRGINIA SECTION OF THE AMERICAN CHEMICAL SOCIETY THE FIRST SEVENTY-FIVE YEARS

Compiled by
Dr. W. Allan Powell

Professor and Chairman Emeritus
Department of Chemistry
University of Richmond
